DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by Horst et al. (6,233,702).

a. Examiner notes that the entire teachings of Horst reference is relied upon, though not all section of the Horst reference has been explicitly discussed, for the follow rejection.

b. In figure 1B, Host teaches all of the claimed limitations as follows:

Claim 1

Horst Reference

- distributed storage management platform architecture comprising
 - feature of figure 1B
- a plurality of storage routers

- feature of 14B of figure 1B
- each one of said storage routers comprises a plurality of interface controllers
 - feature of ports (0,1,2,3) of each router (14b)
- one of said interface controllers of each one of said storage routers is communicatively coupled to a one of said interface controllers of at least one other of said storage routers
 - feature of LA, L' of figure 1B

c. For the above reasons, the claim 1 is clearly anticipated by the teachings of the Horst reference.
